

EHS GLOBAL

ABOUT

Supported by international trade experience, EHS Global Transport, under its 7DAY sub-brand, manufactures and packages spices, legumes, nuts, beverages, detergents, and detergent raw materials, and also provides supply services. With our many years of industry experience, we serve as a reliable solution partner in both local and international markets.

Flexibility is our fundamental principle in our production processes. We offer customized production and private label packaging services according to the needs of businesses and brands, providing desired brand, content, and weight options. Thanks to our modern production infrastructure, we have a wide production capacity, including large-volume industrial packaging.

While packaging spices, legumes, and nuts to high quality standards, we offer different formula and weight options in the beverage category (especially powdered beverages). In detergent production and detergent raw materials, we offer practical and economical alternatives to businesses by developing content solutions tailored to demand.

Our aim is... to offer our customers the advantage of "one-stop supply, production, and logistics" with our wide product range, flexible production capacity, and strong logistics infrastructure.
